

Cultivating Accessible Agriculture

Whoops! I Missed That

Stephen J. Swain, ATP
Assistive Technology Specialist
National AgrAbility Project

Cultivating Accessible Agriculture

We have conducted the farm worksite assessment and have taken the pictures. We start the report when we review the pictures and realize – I missed that! What do they do in the winter? How does he do that in the winter? We have moments when that something smacks us and we realize we goofed up.

Overview

- What are the areas typically missed during the worksite assessment?
- Do we get too conservative with our recommendations?
- Do we lack a plan going forward in providing accommodations?

Weather – Emergency Preparedness

Measurements

Off-farm Employment – New Enterprises

Farm Succession – Family Dynamics

Change in Mobility Devices

Family Secrets

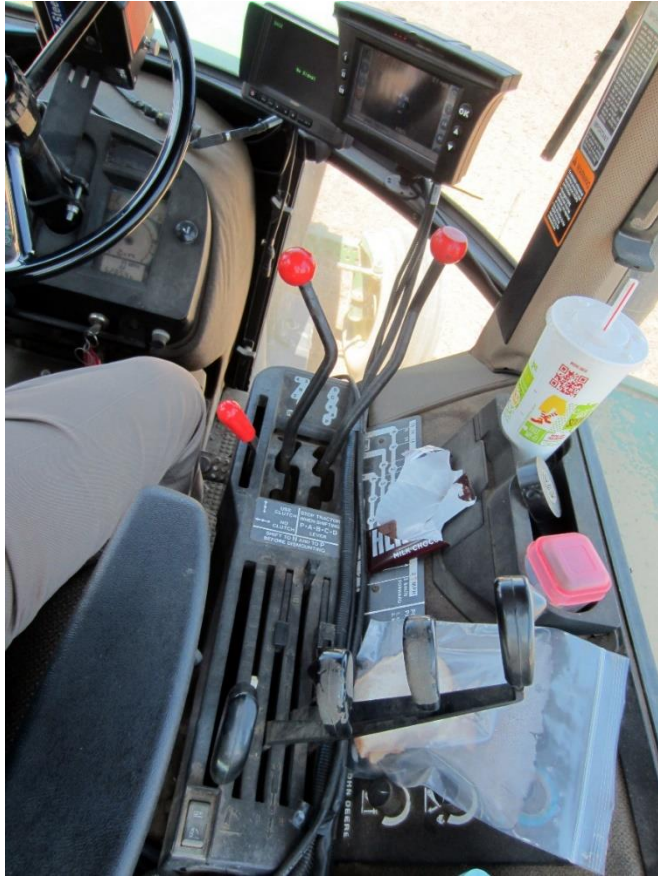

Do we get too conservative
with our recommendations?

Yes, I do.

AgrAbility

Cultivating Accessible Agriculture

- GPS
- Auto steer
- Drones and training and licensing
- Computerized transmission
- Bale accumulator and grapple
- New accommodations to old equipment
- Custom modifications

Do we have a plan going forward to provide services and accommodations.

Do our clients have a plan or are we thinking short term?
What differences do we see as we move forward?
